Looking for a remote job from the Netherlands

Experiences

- Mar 2021 – Today **Senior Devops, Phenix**
As the sole DevOps at Phenix, I am the versatile Swiss Army knife for the development teams. I've established an infrastructure based on AWS with a focus on Kubernetes. My role involves continuously improving this infrastructure, guiding the implementation of tools (CI/CD with Github Actions, migration to Docker), and ensuring the reliability, security, and scalability of our platforms. Furthermore, I contribute to cross-team technical initiatives (recovery plan, security policy, roadmap).
- Jul 2020 – Jan 2021 **Educational consultant, Freelance**
As a Freelancer, I undertook various pedagogical missions for training platforms such as Studi, Open-classrooms, and LibreCours. I was involved in quality control for a complete developer training program, student support, and the creation of course materials (both written and video) for introductory courses in computer science and Linux.
- Jan 2019 – May 2020 **Ops Engineer, Dawex, Lyon (69)**
Within the infrastructure team, I contributed to the maintenance and evolution of the cloud infrastructure (AWS), platform monitoring, and security. Notably, I implemented a complete stack for centralizing and managing logs from our various Kubernetes clusters, leveraging Elasticsearch and Kibana.
- Nov 2018 – Jan 2019 **DevOps, Synolia, Lyon (69)**
Within the sysadmin team, I took part in the implementation of Ansible for automating the configuration of client's servers and managing the employee's workstations.
- Oct 2017 – Oct 2018 **SRE (DevOps) on Kafka, OVH, Lyon (69)**
Setup and administration of internal Kafka clusters at OVH. I ensured service continuity, monitoring, metric reporting, and ongoing product improvement.

Skills

- Environments **GNU/Linux** (Debian/Ubuntu), **Docker**, **Kubernetes**, Amazon Web Services
Tools **Git/Github Actions**, **Terraform**, Ansible, Datadog, Helm, Chef
Languages **Python**, **Bash**, Golang
Softwares Prometheus/Victoria Metrics, Grafana, Elasticsearch
Other **Teaching**, professional english (TOEIC 955/990) and french native speaker

Education

- Sep 2014 – Jul 2017 **Engineering degree in computer science, UTC (60)**
Specialized in system and network administration.
- Sep 2013 – Mai 2014 **Bachelor's degree in Telecommunications and Networks, University of Savoie (73)**
Courses of sysadmin/networking, telecommunications, signal processing and monitoring
- Sep 2011 – Jun 2013 **Technical degree - Electricity and electronics, IUT 1 - Grenoble (38)**
Specialized in automatism and networks.

Hobbies

Computer science and **system administration** enthusiast, I enjoy exploring new tools and **sharing my knowledge**. I dedicate myself to administering my own online services for personal use. I have a particular affinity for **free software** and **privacy**. With a curious nature, I spend a significant amount of time reading popular science, economics, and political materials.
